WiFi advisory notes

The use of WiFi in a public place does come with an element of risk and general guidance on the subject suggests that you should ensure that you have a personal firewall installed and switched on, your anti-virus software is installed, up to date and working and that you do not send private and confidential emails. However, you may also wish to view the following links for more detailed advice:

<http://www.gss.co.uk/newsletter/40/content/599/>

Should you wish to take advantage of a more secure internet access our Boardroom is fully equipped with state of the art audio-visual SmartBoard technology and our office staff would be delighted to discuss our delegate packages and room hire rates.
